Software Developer at Eltern Segen Technologie Pvt. Ltd., building full-stack web and mobile products with React, Node.js and Python, and computer-vision pipelines with YOLO and OpenCV. MCA, Adamas University (2026).

EXPERIENCE

Software Developer · Eltern Segen Technologie Pvt. Ltd. May 2026 – Present · Kolkata

- Develop and maintain web applications with cross-functional teams, across front-end and back-end.
- Designed and developed Aspend, an offline-first Android expense tracker (React Native, Expo, TypeScript, SQLite).

Intern · Univolve Consulting Jul – Aug 2025

Tech Lead, Student Developer Club · Adamas University 2025

- Organised bootcamps and coding sessions; gave workshops on web development, Git and open-source contribution; hosted coding contests.

PROJECTS

Detectify · Traffic violation detection github.com/pratyushnandi/DETECTIFY

Python · YOLOv8 (Ultralytics) · OpenCV · Google Colab

- Trained and evaluated two YOLOv8 models: helmet-violation detection, and vehicle, traffic-light and red-light-violation detection.
- mAP50 0.989 for helmet violations (validation) and 0.886 for red-light violations (test); held-out helmet recall (0.52) is the next fix.
- Designed as the detection core of an automated system that flags violations for human review.

Aspend · Offline-first Android expense tracker Eltern Segen Technologie

React Native · Expo · TypeScript · SQLite · Zustand

- Credit-card accounting that tracks limits and due dates without counting bill payments as new spending.
- CSV, Excel and PDF export; fingerprint or PIN lock with escalating lockout; optional Google Drive backup.

Campus Recruitment Management System Web · Full-stack

Node.js · Express · JWT · JavaScript · HTML/CSS

- Placement portal for students, recruiters and the placement office: drive search, per-drive eligibility checks, an application pipeline and CSV export.
- Role- and relationship-based access: resumes visible only to their owner, admins or recruiters the student applied to.

Ambulance Management System Web · Full-stack

PHP · MySQL · JavaScript · Bootstrap

- Ambulance search and booking with patient and pickup details and booking status, plus management of availability, drivers, emergency requests and trips.
